

### Evolution I

In every breeding program, once permitted the mating of different individuals allows for the possibility of evolution.

The following pages illustrate the variety that the same forms can generate. Stages one and two will remain the same for the purpose of demonstration.

## Frank ~ VII

Frank mutates into a family of scarab beetles, and finally to a scarab with the sun disk. The disk form can be used as a frame for another motif of the clients choice or as a design for the breast or navel.
